SUPPORT FOR PROGRAM MODIFICATION?	NUMBER OF INSTITUTIONS THAT PROVIDE TRAINING	NUMBER OF ANNUAL JOB OPENINGS	
 	LOW 	MEDIUM 	

The Center of Excellence (COE) for the San Diego and Imperial Counties Community Colleges developed this brief to assist the region's community colleges with strategic planning and program development. According to available labor market information, *Data Scientists* in San Diego County have a labor market demand of 149 annual job openings (while average demand for a single occupation in San Diego County is 242 annual job openings), and two educational institutions in San Diego County supply 100 awards for this occupation, suggesting that there is a supply gap in the labor market. Entry-level and median wages for this occupation are above the living wage. This brief recommends that the colleges proceed with caution when developing a new program but supports a program modification because 1) entry-level earnings for this occupation are above the living wage; 2) there is a supply gap in San Diego County; but 3) the typical entry-level education is a bachelor's degree. Colleges should note that the typical educational attainment for this occupation found currently in the national labor force is a master's degree or higher.

Introduction

This report provides labor market information in San Diego County for the following occupational code in the Standard Occupational Classification (SOC)¹ system:

Data Scientists (SOC 15-2051): Develop and implement a set of techniques or analytics applications to transform raw data into meaningful information using data-oriented programming languages and visualization software. Apply data mining, data modeling, natural language processing, and machine learning to extract and analyze information from large structured and unstructured datasets. Visualize, interpret, and report data findings. May create dynamic data reports. Sample reported job titles include:

- Data Visualization Developer
- Data Mining Analyst
- Data Analytics Specialist
- Data Analyst
- Business Intelligence Analyst
- Competitive Intelligence Analyst
- Clinical Data Manager
- Data Management Manager
- Data Deliverables Manager

Projected Occupational Demand

Between 2021 and 2026, *Data Scientists* are projected to increase by 192 net jobs or 13 percent (Exhibit 1). Employers in San Diego County will need to hire 149 workers annually to fill new jobs and backfill jobs due to attrition caused by turnover and retirement, for example.

Exhibit 1: Number of Jobs for *Data Scientists* (2011-2026)²

¹ The Standard Occupational Classification (SOC) system is used by federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating or disseminating data. [bls.gov/soc](https://www.bls.gov/soc/).

² EMSI 2022.03; QCEW, Non-QCEW, Self-Employed.

Earnings

Data Scientists receive entry-level hourly earnings of **\$38.21**; this is more than the living wage for a single adult in San Diego County, which is **\$18.43** per hour (Exhibit 2).³

Exhibit 2: Hourly Earnings⁴ for *Data Scientists* in San Diego County⁵

³ "Family Needs Calculator (formerly the California Family Needs Calculator)," Insight: Center for Community Economic Development, last updated 2021. insightccd.org/family-needs-calculator/.

⁴ 10th and 25th percentiles could be considered entry-level wages, and 75th and 90th percentiles could be considered experienced wages for individuals who may have been in the occupation longer, received more training than others, etc.

⁵ EMSI 2022.03; QCEW, Non-QCEW, Self-Employed.

Educational Supply

Educational supply for an occupation can be estimated by analyzing the number of awards in related Taxonomy of Programs (TOP) or Classification of Instructional Programs (CIP) codes.⁶ There is **one** TOP code and **five** CIP codes related to *Data Scientists* (Exhibit 3).

Exhibit 3: Related TOP and CIP Codes for *Data Scientists*

TOP or CIP Code	TOP or CIP Program Title
TOP 0707.30	Computer Systems Analysis
CIP 11.0802	Data Modeling/Warehousing and Database Administration
CIP 30.7001	Data Science, General
CIP 30.7101	Data Analytics, General
CIP 30.7102	Business Analytics
CIP 30.7103	Data Visualization

According to TOP data, **one** community college supplies the region with awards for this occupation: **San Diego College of Continuing Education**. According to CIP data, **one** non-community-college institution supplies the region with awards: **University of San Diego** (Exhibit 4).

**Exhibit 4: Number of Awards (Certificates and Degrees) Conferred by Postsecondary Institutions
(Program Year 2017-18 through Program Year 2020-21 Average)**

TOP6 or CIP Code	TOP6 or CIP Program Title	3-Yr Annual Average CC Awards (PY18-19 to PY20-21)	Other Educational Institutions 3-Yr Annual Average Awards (PY17-18 to PY19-20)	3-Yr Total Average Supply (PY17-18 to PY20-21)
0707.30	Computer Systems Analysis	90	0	95
	• San Diego Cont. Ed.	90	0	
30.7102	Business Analytics	0	5	5
	• University of San Diego	0	5*	
Total				100

* degrees awarded are master's degrees

⁶ TOP data comes from the California Community Colleges Chancellor's Office MIS Data Mart (datamart.cccco.edu) and CIP data comes from the Integrated Postsecondary Education Data System (nces.ed.gov/ipeds/use-the-data).

Demand vs. Supply

Comparing labor demand (annual openings) with labor supply⁷ suggests that there is a supply gap for this occupation in San Diego County, with 149 annual openings and 100 awards. Comparatively, there are 1,929 annual openings in California and 187 awards, suggesting that there is also a supply gap across the state⁸ (Exhibit 5).

Exhibit 5: Labor Demand (Annual Openings) Compared with Labor Supply (Average Annual Awards)

	Demand (Annual Openings)	Supply (Total Annual Average Supply)	Supply Gap or Oversupply
San Diego	149	100	49
California	1,929	187	1,742

Please note: This is a basic analysis of supply and demand of labor. The data does not include workers currently in the labor force who could fill these positions or workers who are not captured by publicly available data. This data should be used to discuss the potential gaps or oversupply of workers; however, it should not be the only basis for determining whether or not a program should be developed.

⁷ Labor supply can be found from two different sources: EMSI or the California Community Colleges Chancellor's Office MIS Data Mart. EMSI uses CIP codes while MIS uses TOP codes. Different coding systems result in differences in the supply numbers.

¹² Most recent year with available data is Program Year 2018-19. Percentage of Students in a Job Closely Related to Field of Study: Among students who responded to the CTEOS, the percentage reporting employment in the same or similar field as their program of study.

Online Job Postings

This report analyzes not only historical and projected (traditional LMI) data, but also recent data from online job postings (real-time LMI). Online job postings may provide additional insight about recent changes in the labor market that are not captured by historical data. Between 2017 and 2021, there was an average of 2,156 online job posting per year for *Data Scientists* in San Diego County (Exhibit 7). Please note that online job postings do **not** equal labor market demand; demand is represented by annual job openings (see Exhibit 1). While this brief includes online jobs postings data to help with curriculum development, the community colleges should note that this type of data is impacted by several variables: employers may post a position multiple times to increase the pool of applicants; a job posting can remain posted after a business decides not to fill a position; or an employer may use one posting to fill multiple positions, for example.

Exhibit 7: Number of Online Job Postings for *Data Scientists* in San Diego County (2017-2021)¹³

Top Employers

Between January 1, 2019 and December 31, 2021, the top five employers in San Diego County for *Data Scientists* were University of California San Diego, Elevance Health, Intuit, Qualcomm, and Kforce based on online job postings (Exhibit 8).
